

**Confidential Waxing Consultation Card**

Name \_\_\_\_\_ Technicians Name \_\_\_\_\_

Date and Time of Treatment \_\_\_\_\_

**Client Analysis**

Have you been waxed before? \_\_\_\_\_ What area? \_\_\_\_\_

Any problems? \_\_\_\_\_

Do you take or use any products that contain the following:

Isotretinoin \_\_\_\_\_ Tetracycline \_\_\_\_\_ Retinoic Acid \_\_\_\_\_ AHA Glycolic Acid \_\_\_\_\_ Hydroquinone \_\_\_\_\_

Have you recently had any type of chemical or glycolic peel? Yes \_\_\_\_\_ No \_\_\_\_\_

If glycolic, what percentage? \_\_\_\_\_ If chemical, please explain \_\_\_\_\_

Any recent surgery or dermabrasion? Yes \_\_\_\_\_ No \_\_\_\_\_

Any skin cancer or removal of skin cancer? Yes \_\_\_\_\_ No \_\_\_\_\_

Are you pregnant? Yes \_\_\_\_\_ No \_\_\_\_\_ Are you a hemophiliac? Yes \_\_\_\_\_ No \_\_\_\_\_

Are you on your menstrual cycle? Yes \_\_\_\_\_ No \_\_\_\_\_

Are you on any medications, including birth control? If yes, list: \_\_\_\_\_

How would you rate your sensitivity to pain? Low \_\_\_\_\_ Medium \_\_\_\_\_ High \_\_\_\_\_

Do you have any moles, warts, abrasions, skin irritations or skin inflammations in the areas to be waxed? Yes \_\_\_\_\_ No \_\_\_\_\_

If yes, please list: \_\_\_\_\_

Do you have any allergies? \_\_\_\_\_

Have you been exposed to any tanning method in the past 24 hours? Yes \_\_\_\_\_ No \_\_\_\_\_

Have you taken any blood thinners, aspirin or any anticoagulating medication within the past 24 hours? Yes \_\_\_\_\_ No \_\_\_\_\_

In an effort to make your waxing experience as comfortable as possible, please supply your wax technician with all the necessary details in regard to past waxing procedures or health information not requested on this form.

**Release for Waxing Service**

I understand that the waxing service I have requested involves the application of heated products that may cause an adverse reaction to my hair, skin or body on which the service is performed. I fully understand that this establishment and its agents may refuse to perform the treatment I have requested if I have answered "yes" to any of the above questions. I have read the before-and-after procedures sheet provided to me by my technician and understand that failure to follow these instructions could result in an adverse reaction that may cause injury or damage to my skin. I hereby release this establishment, its agents and suppliers from any and all damage or injury that may result from the treatment I requested. I further agree that I am over the age of 18 years old.

### Post-waxing - 48 hours

During waxing, the pores are open. This can result in infection if not cared for properly. To avoid infection, which can be severe, you must adhere to the following for at least 24 - 48 hours after waxing:

- Wear clean, loose clothes since tight clothes can irritate the skin and cause infections.
- Do not touch waxed area.
- Do not soak in water (pools, hot tubs, bath tubs, etc.). Chlorine should be avoided due to the harm it can cause.
- Do not use tanning beds nor sun bathe since it may cause skin discoloration.
- Try to avoid activities that may cause excessive perspiration since it may cause skin rashes.
- No sex for 48 hours after Brazilian Bikini wax.
- To diminish redness/irritation apply calming lotions recommended by your technician.

### POST CARE DOs

- **Creams or lotions** - These minimize redness, irritations, or possible pustule infections. Products that contain azulene, tea tree oil, lavender, or lemon essential oils, camphor and menthol are ideal.
- **Ingrown hair treatment products** – An ingrown hair is a hair that curls back on itself and starts growing back into the follicle, or a hair that fails to grow out of the follicle and stays embedded in the skin. Ingrown hairs are usually just minor irritations, but they can be painful and unsightly. What's more, if they are left untreated, ingrown hairs can become infected.

These items contain effective ingredients to soften the skin, clear the follicle and allow the hair, when it is ready to grow again, to pierce through the skin. Check the content of these products because a high percentage can cause chafing and drying of the skin, which can become very irritated, especially on the panty line.

- **Hair retardants** - These are ideal for dealing with excess hormonal hair growth or for use during the summer when the sun exposure is excessive. Hair retardants are ideal to slow down the growth process, creating finer, sparser, new hair.
- **Body wash, lotions and exfoliants** - These are ideal to rid the follicle of dry skin, dirt and debris, and to maintain the skin's suppleness.

**RENU ADHERES TO VERY STERILE WAXING PROCEDURES. IF YOU FOLLOW THE ABOVE RULES, YOU SHOULD HAVE NO WAXING RELATED PROBLEMS.**

### Attention please!!!

People with diabetes or weakened immune systems, such as HIV are not good candidates, as well as people undergoing chemotherapy.

*I have read and understand the above instructions on post-waxing.*
